Clelands Construction have completed many projects designed by Jackson Architects over the years. There is a wide range of type, including education projects.

Percy Thomson Art Gallery, Stratford	\$1.3m
Reef Apartments	\$4.8m
Taranaki Hospice	\$2.3m
Busing Russell & Co Offices	\$2.5m
Coastal Taranaki School	\$3.5m

Clelands Construction are our contractor of choice in the Taranaki area due to their superior project management, and quality of project delivery. They are well organised and have extensive resources.

Pricing is competitive as a number of the above projects have been won on a tender basis. Clelands are fair in assessing variations and contract issues and control subcontract pricing to minimise costs. Change orders are kept current.

I have previously worked with Clelands on projects around the North Island for Burger King and found that they are able to mobilize and control projects in many locations.

The Coastal Taranaki School project was a particularly demanding one with dovetailed stages, multiple work faces, major alteration component, continued occupation and tight program. Programing was thorough and worked well to minimize the impact on the school. Clelands have a good understanding of the specific issues involved with MOE projects.

Accordingly I would recommend Clelands Construction for any projects in the North Island region.
